Swisspearl Texial

Uniqueness through hand embossing

Innovative and sustainable products made of natural raw materials, such as the new large size façade panels Texial, are borne of ingenuity and expertise. The fine surface structure gives the appearance of a fabric and is always one-of-a-kind because it is embossed by hand.

Delicate nuances of color and the raw texture that is the result of the mechanical embossing process highlight the authenticity of the work. A vibrant interplay of light and shadow creates a dynamic effect, making the façades appear almost like a piece of cloth.

Natural and harmonic color spectrum

Design, color and formats

Texial is available in five colors. While the earth tones blend seamlessly into their environment, at the same time they also make an impact because of their timeless nature. The natural, harmonic color spectrum underlines the character of Texial.

Info

Panel size

3050 × 1250 × 8 mm

2510 × 1250 × 8 mm

Useable, finished panel sizes, after all four panel edges have been trimmed off

Colors

Five earth tones

Installation

Refer to our large size Design + Installation Manual (DIM)
