

Special remarks

Panel sizes Maximum useable finished panel sizes, after all four panel edges have been trimmed off.	Avera, Incora, Texial, Vintago: Only available in 8 mm thickness.	Gravial: Only available in 12 mm thickness.
Maximum useable finished panel sizes, after all four panel edges have been trimmed off.		
Maximum useable finished panel sizes, after all four panel edges have been trimmed off.	930 mm width panels Panels with 930 mm width are only available in selected Carat colors and require a minimum order quantity of 500 panels.	Because 930 mm and 1250 mm panels are produced from different production batches, it is not suggested to intermix the panels on the same façade as slight color discrepancies may exists.

General information

The various finishes and colors allow the unique character of the Swisspearl panels to be expressed in an almost endless diversity. The carefully chosen full-body color and color finishes, each in their own way, emphasize the unmistakable aesthetics of the material, combined material and color to form a single whole.

CARAT	Unique natural look and timeless beauty. The translucent lightly pigmented finish adds a distinguished expression.
GRAVIAL	Rich contrast, unique interplay of light and shadow. The linear geometrical grooved surface offers countless options for making a special statement.
VINTAGO	Natural authentic, lively and unique look. The sanded surface highlights the purity of the fiber cement panel.
TEXIAL	A collaboration between woven fabric and embossed fiber cement. The unique embossing creates a vibrant interplay of light and shadow.
AVERA	Authentic and vibrant. The transparent coating lets the original natural look of the fiber cement shine through.
INCORA	Stylishly authentic with a vivid spreading pattern and unique interplay of colors.
REFLEX	A shiny look and metallic character. Depending on the lighting and vantage point, the reflective surface coating produces amazing nuances of color.
NOBILIS	The semi-translucent surface coating on a pure acrylic basis provides the classic, deep, visual fiber cement appeal.

For detailed specifications please refer to our DIM (Design and Installation Manual) or contact one of our dedicated Technical Advisors.

The printed colors may differ from the original shade of the color. To see the exact color, and when matching up colors on adjacent parts of a building, one must use the original panel samples. The natural ingredients used in the fiber cement panels will to some extent determine the unique character of the material. The intensity and color tone may vary slightly depending on the production batch.

More details can be found on our website.
